

Making Big Money through Algo Trading

When it comes to making money in the stock market, there are a lot of different approaches that traders can take. Some people focus on fundamental analysis, while others use technical analysis. One of the most popular methods of trading these days is also trading or algorithmic trading. Algo trading is becoming more and more popular, especially in India. This is because it can be very profitable, and it takes away the emotional element from trading.

If you're thinking of getting into Algo trading, there are a few things you need to know.

First, you need to have a good understanding of the stock market and how it works.

Second, you need to be comfortable with using computer programs to make your trades.

If you can meet these two requirements, then you might be ready to start making some big money through Algo trading!

Using Algo Trading has its benefits too. In Algo, everything is backtested. All your strategies will be executed by the computer, you just have to make a set of rules to apply. As mentioned above, you are not as emotionally affected by Algo trading. Also, you can diversify your strategies, market, and timeframes. And lastly, the computer never sleeps. So, your Algo strategies run as long as the market is open.

In 2008, the Algo trading market opened in India. In 2022, 50% of trading in India happens Algorithmically. In America, this percentage is at 70. There are major algo trading/HFT companies in India that hire Algo traders. WorldQuant LLC, Morgan Stanley, Goldman Sachs, Edelweiss, QuantAI Capital, Quadeye Securities, and Future First are a few of them.
